Product Features

Easy operation, change tube rapidly. The house material is PPS (polyphenylene sulfite). 304 stainless steel rollers.

DZ25 pump head use 2.4mm wall thickness tube, the flow rate range is 0.211-3600mL/min. This pump head is suitable for high viscous liquid which include granule and floc. It also suitable for high pressure request. New cartridge structure design, can use the special connector, connect low cost tubing outside the pump head to save cost; also can use flexible tube clamp, meet hygiene requirement.

Typical Application

- 1.This pump head is suitable for high viscous liquid which include granule and floc.
- 2.It is also suitable for high pressure request.
